

PHAAR

Designed by
Moróro

Colour: black

Phaar is a flashlight and floor spotlight in one. The light object has a spherical lens covering the LED light, which creates a beautiful, circular beam of light that easily radiates up to twenty metres far and for up to thirteen hours. Thanks to the lever Phaar can also be used as a stable floor spotlight. The touch function at the back of the lantern also allows you to dim the light.

Phaar is a functional design object. This portable garden lamp is made of black powder-coated and anodised aluminium and has a rechargeable battery that can be charged with the accompanying charger.
